

Damien Theuveny

Internationally minded, engineering postgraduate specialising in programming and design through Adobe software packages and programming languages such as HTML, CSS/SCSS/SASS/LESS, javascript and JQuery. Currently looking to gain employment in the fields related to web design/development or mobile application design/development.

Address: 15 Redwood Lodge, Grange Road, Cambridge, United Kingdom. CB3 9AR.

Email: dclt3@kent.ac.uk or damien.theuveny@gmail.com

Mobile: +447904531847 **Languages:** English and French

Nationality: French

EDUCATION

2014-2015 University of Kent, Canterbury
MSc Mobile Application Design - Graduating September 2015

This postgraduate program is focused on the rapidly expanding and evolving field of the mobile industry. The program covers the technology, interface design and application development for several mobile platforms.

MSc modules include:

- **Client Project Application Design**

A group based project working with real clients. Gained experience in working as a team and maintaining a client-developer relationship.

- **HCI and UI Design**

A module focused on user experience, developing/designing with the user in mind and analysing user behaviour/interaction.

- **Web, Android and iOS Design/Development**

Each of the modules isolated a particular type of application and tested various programming skills such as Java, objective C, HTML, CSS, Javascript and PHP.

2010-2014 University of Kent, Canterbury
**BSc Multimedia Technology and Design with one year in industry
(Graduated July 2014)**

The undergraduate program was a combination of multiple technical and creative disciplines including web design/development, 3d modelling and compositing which provide a good understanding of the underlying digital technologies as well as design skills necessary to succeed in a competitive industry.

BSc modules include:

- **Mobile Application Design (73%)**

Introduction to the development of applications for mobile devices, which is a rapidly expanding and evolving field. The module combines technology, interface design and application development for mobile platforms.

- **Software Development (92%)**

Programming languages include Visual C# and the UML design language with a strong Introduction to the software engineering techniques and process.

- **Website Design (71%)**

Organising text, image and other content into a website format using HTML, CSS and Javascript.

2008-2010 Long Road Sixth Form College, Cambridge

- A-Levels in Computing, ICT and Maths (Statistics).
- AS Level in Media Studies.
- ASSET Spanish grade 3 in listening and reading.

2005-2008 Parkside Community College, Cambridge

- GCSEs in English, Maths, Additional Maths, Science, Additional Science, History, Media Studies and French.
- Level 2 Certificate in Digital Applications.

EXPERIENCE

2012-2013 EUROCONTROL (Institute of Air Navigation Services), Luxembourg
E-Learning Developer Intern

The internship at EUROCONTROL allowed me to hugely improve my web design/development skills and I developed a strong interest into designing with mobile devices in mind. I was often responsible for projects from start to finish, I would have to communicate and work closely with the internal client that requested the project. I was also asked to consult or to fix errors in projects or update projects to varying degrees. I managed content for EUROCONTROL such as the E-Learning material I produced using legacy software and I was asked to make recommendation for possible future software implementations.

2010-2012 Baybuk (start-up online bookings company), UK
Director of Media

My responsibility has mainly been to attend and report within business meetings as well as attending several business conferences in which I have been directly engaging with other businesses and clients to communicate the advantages that Baybuk could bring to the respective parties. Through these opportunities I have gained a lot of confidence in building constructive relationships and dialogs which will be very helpful to me in the future.

TECHNICAL SKILLS

- **Web Design**
HTML, PHP, CSS, SASS/SCSS, Javascript and Actionsript.
- **Video and Image Editing**
Adobe Photoshop, After Effects and Premier Pro.
- **3D Modelling and Animation**
AutoDesk 3DS Max, Mudbox, Nuke, Adobe Photoshop, After Effects and Flash.
- **Programming Languages**
C, C#, Pascal, Java, XML

PERSONAL SKILLS AND INTERESTS

I very much enjoy finding out about and keeping up to date with new advancements within the Multimedia industry from photographic technology to mobile technology and new software releases. The dawn of HTML5 and CSS3 has really captivated my attention and it seems the more I learn and discover about them the more there still is to discover and create.

Having grown up in many parts of the world from Brazil, Algeria, Libya and Norway before moving to England and then to Luxembourg for an internship; I have learnt to settle into to my surroundings efficiently. I have developed an important interest in languages while travelling around the world, which has lead to me taking it upon myself to develop my communication skills not only in English but in other languages.

I enjoy playing many sports although I focus mainly on Ice Hockey and Snowboarding. Practising these sports has helped me develop my character and mindset. My particular interest in Ice Hockey lead to me being nominated President and Treasurer of the University Ice Hockey club, the combined duties of President and Treasurer have certainly tested my organisational skills and the negotiating of terms/contracts with suppliers and possible sponsors has improved my confidence and communication skills. Upon returning from Luxembourg I was re-elected as President for a second time and again this past year while doing my MSc I was re-elected a 3rd time as President and I was also elected as Captain.
